**Chase Specialized Manufacturing**

This segment of the business experienced an excellent quarter as the spring season brought increased demand for our asphalt additive Rosphalt 50®, Pipeline products and other Chase Construction products. Strong demand for key brands HumiSeal®, Paper Tyger®, and Chase BIH<sub>2</sub>Ock®, continued in the current quarter. Management remains focused on organizing this business segment along its eight core product lines in order to leverage critical fixed costs. The recent acquisition of a new manufacturing facility in greater Pittsburgh, PA will allow for additional production capacity and improved overall efficiencies with our existing product lines as well as the ability to integrate future acquisitions.

The Company's recently established French entity, HumiSeal Europe SARL, has helped the Company expand its presence in Europe and the overall HumiSeal brand. Shortly after being established, HumiSeal Europe SARL acquired certain assets from Metronelec SARL, a former distributor of HumiSeal products, in March 2007. The new business is working closely with our HumiSeal operation in Camberley, Surrey, England and has allowed for direct sales and services to the French market.

#### Chase Electronic Manufacturing Services (EMS)

Continued strong demand for electronic manufacturing services from the Company's Chase EMS business segment resulted in revenues of \$4.9 million in the current quarter compared to \$3.3 million in the prior year period. Increased quoting activity from existing and new customers continues to build backlog while bookings made over the past year generated sales in the current period. The increased demand for this segment's services has resulted in improved profits overall, although ongoing pressure from key customers to keep sale prices low continues to negatively impact margins. This operation continues to do well leveraging its overhead costs and utilizing investments made in capital equipment over the past two years.
